FridgeWize is Finalist in RAC Cooling Industry Awards 2016

Q-Blade Shortlisted for Refrigeration Innovation of the Year

June 29, 2016 - Carbondale, CO -- FridgeWize is pleased to announce that they have been included on the prestigious shortlist for the RAC Cooling Industry Awards 2016, where their revolutionary Q-Blade is a finalist for Refrigeration Innovation of the Year.

The RAC Cooling Industry Awards champions the leading innovations and environmental successes in the refrigeration and air conditioning industry, and are known for being the industry's biggest and most-respected awards event.

"This year the competition was fierce and the judges only selected those who demonstrated the very highest standards," reported the Cooling Industry Awards Team.

According to the RAC Cooling Industry Awards, the Refrigeration Innovation of the Year Award recognizes the cutting-edge use of refrigeration technology at the component level or in processes, where the new technology provides a definitive change to existing techniques or equipment.

"We are honored and excited to have the chance to showcase our Q-Blade for the RAC Cooling Industry Awards. There is no other blade currently on the market that offers the efficiency that our Q-blade offers. It allows commercial businesses to drastically reduce the energy consumption of their refrigeration components, which in some cases may account for upwards of 30% of the total energy usage of a single location - the impact is huge!" said Ryan Grobler, CEO/President of FridgeWize.

The FridgeWize Q-Blade was recognized last year as Environmental Leader's Product of the Year and as a Platt's Global Energy Awards finalist for Commercial Application of the Year.

The trophies for this year's RAC Cooling Industry Awards will be presented on September 28th, 2016 at the London Hilton on Park Lane.
