

FridgeWize is Finalist in 2016 Energy Awards

Q-Blade Continues to Shine in the Global Energy Industry

October 18, 2016, Kansas City, MO -- [FridgeWize](#) - the leading provider of energy-efficient commercial heating and cooling solutions - is excited to announce it has been named a finalist for the [The Energy Awards](#). The award-winning Q Blade is at it again, this time up for the Energy Efficient Product of the Year - HVAC&R. This news follows another humbling milestone achieved earlier this month when FridgeWize's Q Blade was the proud recipient of the prestigious [RAC Cooling Industry Awards](#).

The Energy Awards is one of the most admired and respected in the industry, celebrating excellence for the intelligent use of energy. *"There is an immense talent that exists across the energy industry, despite the continually challenging environment, and the fact that FridgeWize has been selected as a finalist is testament to the work they have achieved in this sector over the past year."* said Andrew Gaved, Editor-in-Chief of H&V News and RAC, and host of the Energy Awards.

FridgeWize continues a tradition of cutting edge technology, headed by the recognized leading technical experts in the industry. Founded in Carbondale, Colorado in 2010, FridgeWize has grown to be a multi-million dollar energy efficiency company focused on the most efficient carbon fiber fan blades in the industry including the revolutionary Q Blade.

"It is truly rewarding for FridgeWize to receive this recognition from the international community, and provides validation to the effort put forth, to the product, and to everything the Q Blade has made possible in the energy saving world" said Ryan Grobler, FridgeWize President and CEO. He also shared his hope for the Q Blade's greater potential impact saying, *"We strive to stay at the cutting edge of reducing the global carbon footprint from this industry, and hope to see our Q Blade in every applicable application worldwide."*

FridgeWize has been recognized for its advancements in energy savings in the past, just this month receiving the Innovation of the Year Award by [RAC Cooling Industry Awards](#). They are also the proud recipient of [Environmental Leader's Top Product of the Year](#) in 2015 and as a finalist at the 2015 [Platts Global Energy Awards](#) for Commercial Application of the Year.

The winners of the Energy Awards 2016 will be revealed on 30th November at the London Hilton on Park Lane where the energy industry elite will come together for a night of recognition and celebration of the sector's achievements.

###

FridgeWize is the leading provider of energy-efficient commercial heating and cooling solutions.
