

FridgeWize Wins Coveted 2016 International Energy Award

Top Product of the Year Award Marks A Crowning Achievement

December 9th, 2016, Kansas City, MO -- [FridgeWize](#) is humbled to announce that it has won its second consecutive global energy award this year, putting the spotlight on this rapidly growing Kansas City based company. The award-winning FridgeWize Q Blade was named Energy Efficient Product of the Year HVAC&R at [The Energy Awards](#) on November 30th. This win follows another exhilarating milestone achieved when FridgeWize’s Q Blade was the proud recipient of the prestigious [RAC Cooling Industry Awards](#).

“We were nominated in the same category as industry giants Samsung and Toshiba, this alone was a great honor. Winning the 2016 Energy Awards top honors for Product of the Year has been truly humbling. This award is to-date the crowning achievement for our team at FridgeWize and for the Q-blade. Thank you to all of the judges for recognizing a simple yet effective technology that can change the face of an industry” shared CEO and President of FridgeWize, Ryan Grobler, after accepting the award on behalf of the company.

The Energy Awards are the most admired and relevant awards in the energy industry with 19 targeted categories, covering every aspect of the energy industry from Smart Product of the Year to Innovation of the Year. FridgeWize won Energy Efficient product of the Year HVAC&R for their game-changing Q Blade, beating notable renewable energy giants including Samsung and Toshiba.

“Energy is such a vital part of business and domestic life. Everyone has to engage with it in one way or another - it has an impact on the bottom line; it has an impact on our comfort and the carbon it uses has an impact on the planet. As a winner, FridgeWize is in the front line of managing energy, reducing energy consumption and promoting best practice for their employees and customers and they have shown a great deal of innovation in the process.” said Andrew Gaved, Editor-in-Chief of H&V News and RAC, and host of the Energy Awards.

FridgeWize continues a tradition of reducing global energy consumption through its innovative technology, headed by a recognized team of leading experts in the industry. Founded in Carbondale, Colorado in 2010, FridgeWize has grown to be a multi-million dollar energy efficiency company focused on the most efficient carbon fiber fan blades in the industry, including the revolutionary Q Blade.

FridgeWize has been consistently recognized for its advancements in energy savings, just last month receiving the Innovation of the Year Award by [RAC Cooling Industry Awards](#). They are also the proud recipient of [Environmental Leader’s Top Product of the Year](#) in 2015 and as a finalist at the 2015 [Platts Global Energy Awards](#) for Commercial Application of the Year.
