

PRODUCT INFORMATION

Q10 AND Q12 CARBON FIBER BLADES

Our Carbon Fiber Blades are recognized as the most efficient blades in the industry, having previously won the global innovation energy efficient product of the year award - HVAC&R.

SUMMARY

FridgeWize offers a carbon fiber blade that is perfectly balanced for optimal air flow making these blades superior to all aluminum blades on the market.

Manufacturing blades using carbon fiber technology results in a lightweight product with high tensile strength.

These blades in conjunction with EC motors can contribute to an additional 50% energy reduction whilst optimizing airflow.

SPECIFICATIONS

- Blade Color: Black
- Brand: FridgeWize
- Diameter (inches)
 - > 10 inches
 - > 12 inches
- Number of Wings: 4
- Tensile strength: 207,PSI compared to 20,000 PSI (Aluminum blade).
- 5 year warranty

BENEFITS

De-Stress Motor

- Light blades de-stress EC motors and can reduce watt draw by approximately 50% on EC motors.

More Durable

- Q-Blades retain their original manufactured shape in contrast to aluminum blades which become warped over time, reducing efficiency.

No Rust

- Carbon Fiber will not rust to the shaft of the motor.

FridgeWize Warranty

- FridgeWize provides a 5-year warranty on all blades

FEATURES

- 5-year limited warranty
- Dual Rotation
- Retains its shape
- Provides same CFM as aluminum blades.
- Made in United States
